Career Objective

Final-year Information Technology student seeking a Business Analyst Assistant position. Experienced in cleaning, validating, and analyzing data, building reports and dashboards, and programming in Python, SQL, and JavaScript. Careful, honest, and proactive, with strong logical thinking and a focus on data accuracy. Eager to support the data and project reporting team, learn research data tools such as SPSS, and communicate findings clearly to managers and related departments.

Education

University of Transport Ho Chi Minh City (UTH)

10/2022 – 10/2026

Bachelor of Information Technology – Completed coursework

- GPA: **3.4 / 4.0**
- **Excellent Scholarship** – Semester 1, 2025
- **Second Prize – AI Track**, UTH Student Scientific Research Conference 2025

Skills

Data Analysis	Data Cleaning, Data Validation & Accuracy Checking, Exploratory Data Analysis (EDA), Trend Analysis, KPI Analysis, Statistical Analysis
Programming	Python (Pandas, NumPy), SQL, JavaScript, TypeScript
SQL / Databases	PostgreSQL, SQL Server, MySQL, Joins, CTEs, Aggregations, Subqueries, Window Functions
Excel	Pivot Table, Lookup Functions, Data Cleaning, Filtering, Reporting
BI / Visualization	Power BI, DAX, Dashboard Development, Data Visualization, Matplotlib, Seaborn
ETL / Automation	ETL/ELT, dbt, Apache Airflow, Data Pipeline
Tools & Collaboration	Jira, Confluence, Git, Docker, Postman, VS Code

Work Experience

Gotik Consulting – Data Engineer

Python | dbt | PostgreSQL | Airflow | Power BI

03/2026 – 05/2026

- Cleaned, checked, and standardized Odoo business data with Python and SQL to detect discrepancies and ensure the accuracy of datasets used for analysis and reporting.
- Wrote SQL queries to aggregate, filter, and join data, cross-checking results to provide reliable figures for reports.
- Built Power BI dashboards and prepared regular reports on operational metrics to support management decisions.
- Developed dbt models and Python ETL pipelines, automated with Apache Airflow, to turn raw data into structured, reusable analytical datasets.

Featured Projects

Delivery Driver – Order Analytics System

Python | SQL | Kafka | PostgreSQL | Power BI

12/2025 – 02/2026

- Built an automated data pipeline with a Data Lake and Data Warehouse to collect, process, and prepare order data for analysis.
- Applied RFM and Association Rule Mining to analyze customer behavior and frequent pickup–delivery location patterns, generating insights for business recommendations.
- GitHub: BE-delivery-driver

VehicleScan – Smart Parking Data System

Python | SQL | PostgreSQL | Firebase | ESP32

03/2025 – 03/2026

- Collected and processed vehicle and IoT sensor data with Python and SQL for real-time parking management.
- Integrated AI, sensor, and application data into one centralized system to support monitoring and data analysis.
- GitHub: VehicleScanner

Additional Information

Soft Skills	Logical thinking | Time management and multitasking | Careful, honest, proactive | Clear communication
English	TOEIC 500; technical document reading and basic professional communication
Availability	Available for full-time Business Analyst Assistant opportunities.
