Ho Huynh Nhu

AI Engineer

20/10/2003 | (+84) 367 503 477 | hhnhu2003@gmail.com | Ho Chi Minh City

github.com/hohuynhnhu | facebook.com/huynhnhu.ho.961

Career Objective

Final-year Information Technology student pursuing an AI Engineer career, with hands-on experience in Computer Vision, Deep Learning, and Python-based AI systems. Experienced in developing, training, evaluating, and integrating AI models including YOLO, CNN, Siamese Networks, MediaPipe, and Transformer. Seeking an AI Engineer position to apply machine learning knowledge to real-world products and continue developing expertise in AI model development and deployment.

Education

University of Transport Ho Chi Minh City (UTH)

10/2022 – 10/2026

Bachelor of Information Technology – Completed coursework

- GPA: 3.4 / 4.0
- **Excellent Scholarship** – Semester 1, 2025
- **Second Prize – AI Track**, UTH Student Scientific Research Conference 2025

Technical Skills

AI / Machine Learning	Machine Learning, Deep Learning, Computer Vision, CNN, YOLO, Siamese Network, Transformer
Computer Vision	Object Detection, Pose Estimation, Image Classification, Face Recognition, Image Processing, MediaPipe
AI Development	Python, PyTorch, OpenCV, Ultralytics YOLO, FastAPI, NumPy, Pandas
AI Models	YOLOv8, YOLO Pose, CNN, Siamese Network, Transformer Encoder, ArcFace, MediaPipe
Backend / API	Python, FastAPI, Node.js, RESTful API
Database / Data	PostgreSQL, SQL Server, MongoDB, Firebase, Supabase, dbt, Airflow
Tools	Git, Docker, Postman, VS Code, Power BI
Programming	Python, SQL, TypeScript, JavaScript, Kotlin
English	Technical document reading and basic professional communication

Work Experience

Gotik Consulting – Data Engineer

Python | dbt | PostgreSQL | Airflow

03/2026 – 05/2026

- Processed and transformed Odoo data for analytics and reporting workflows.
- Developed Python-based data pipelines and data models using dbt and Neon PostgreSQL.
- Automated hourly data processing workflows with Apache Airflow.
- Prepared structured datasets for analysis and developed Power BI dashboards for operational monitoring.

Featured AI Projects

Fall Detection – Real-Time AI Fall Detection System

Python | YOLOv8 Pose | MediaPipe | Transformer | FastAPI

04/2026 – 06/2026

- Developed a real-time fall detection system using YOLOv8 Pose, MediaPipe, and Transformer.
- Trained a Transformer Encoder with 30-frame × 200-feature input for fall/non-fall classification.
- Achieved 97.8% mean accuracy with 5-fold cross-validation and integrated FastAPI for real-time alerts.
- GitHub: Fall-Detection

VehicleScan – Smart Parking System with AI & IoT

Python | YOLO | CNN | Siamese Network | ESP32

03/2025 – 03/2026

- Developed vehicle detection and recognition models using YOLO, CNN, and Siamese Network.
- Prepared datasets and trained AI models for real-time vehicle identification.
- Integrated AI models with ESP32 and Firebase; won Second Prize – AI Track at UTH 2025.
- GitHub: VehicleScanner

Additional Information

Soft Skills	Problem-solving | Research and self-learning | Teamwork | Troubleshooting
AI Interests	Computer Vision | Deep Learning | AI Model Development | Real-time AI Systems
Other	Experience integrating AI models with APIs, databases, IoT devices, and real-time applications.
Availability	Available for full-time AI Engineer opportunities and willing to adapt to job requirements.
