Career Objective

Final-year Information Technology student seeking an ERP Statistics Staff position. Experienced in working with business data from the Odoo ERP system: extracting, cleaning, validating, and aggregating data to produce accurate statistics and periodic reports with SQL, Excel, Python, and Power BI. Careful and responsible, with a strong focus on data accuracy and on automating repetitive reporting tasks to save time and keep figures up to date.

Education

University of Transport Ho Chi Minh City (UTH)

10/2022 – 10/2026

Bachelor of Information Technology – Completed coursework

- GPA: **3.4 / 4.0**
- **Excellent Scholarship** – Semester 1, 2025
- **Second Prize – AI Track**, UTH Student Scientific Research Conference 2025

Technical Skills

ERP Data & Statistics	Odoo ERP business data, Data Extraction, Data Aggregation, Periodic Statistical Reports, KPI Analysis, Data Validation & Accuracy Checking
Excel	Pivot Table, Lookup Functions, Data Cleaning, Filtering, Summarizing, Reporting
SQL / Databases	SQL, PostgreSQL, SQL Server, MySQL, Joins, CTEs, Aggregations, Subqueries, Window Functions
BI / Visualization	Power BI, DAX, Dashboard Development, Data Visualization, Operational Reporting
Data Processing & Automation	Python, Pandas, NumPy, ETL/ELT, dbt, Apache Airflow
Tools	Git, Docker, Postman, VS Code, Jira, Confluence

Work Experience

Gotik Consulting – Data Engineer

Python | dbt | PostgreSQL | Airflow | Power BI

03/2026 – 05/2026

- Extracted, cleaned, and validated business data from the Odoo ERP system using Python and SQL, detecting discrepancies and preparing accurate, structured datasets for statistics and reporting.
- Built ETL pipelines to load processed data into Neon PostgreSQL, and automated hourly data workflows with Apache Airflow so that reports are always based on up-to-date data.
- Wrote SQL queries for aggregation, filtering, joins, and analytical reporting, cross-checking results to ensure reliable figures.
- Developed dbt models to standardize raw data into reusable analytical datasets, improving consistency across reports.
- Built Power BI dashboards and regular reports on operational and business metrics, helping management monitor performance.

Featured Data Projects

Delivery Driver – Order Management & Data Analytics System

Python | PostgreSQL | Kafka | MinIO | RFM | Association Rule Mining

12/2025 – 02/2026

- Built an automated data pipeline with a Data Lake and Data Warehouse to collect, process, and prepare order data for statistical analysis.
- Applied RFM and Association Rule Mining to analyze customer orders and frequent pickup–delivery location pairs, generating insights to support business recommendations.
- GitHub: BE-delivery-driver

VehicleScan – Smart Parking Data System

Python | PostgreSQL | Firebase | ESP32 | Kafka

03/2025 – 03/2026

- Collected and processed vehicle and IoT sensor data with Python and SQL, integrating AI, sensor, and application data into one centralized system for real-time monitoring and analysis.
- GitHub: VehicleScanner

Additional Information

English	Technical document reading and basic professional communication
Working Style	Careful, responsible, detail-oriented; proactive and quick to learn.
Availability	Available for full-time ERP Statistics Staff opportunities.
