Career Objective

Final-year Information Technology student seeking an internship in ERP implementation and operations. Experienced in working with business data from the Odoo ERP system (extraction, standardization, reporting), automating data workflows, integrating systems through APIs, and building Power BI reports to monitor operations. Experienced in teamwork using Jira and Confluence, and eager to learn and contribute to requirement analysis, process setup, progress tracking, and risk control in ERP projects.

Education

University of Transport Ho Chi Minh City (UTH)

10/2022 – 10/2026

Bachelor of Information Technology – Completed coursework

- GPA: **3.4 / 4.0**
- **Excellent Scholarship** – Semester 1, 2025
- **Second Prize – AI Track**, UTH Student Scientific Research Conference 2025

Technical Skills

ERP & Business Process	Odoo (business data), Process Analysis through Data, Workflow Automation (Power Apps, SharePoint), Process Documentation
System Integration	RESTful API, FastAPI, Postman, Microservices, RabbitMQ, Kafka
SQL / Databases	SQL, PostgreSQL, SQL Server, MySQL, Joins, Aggregations, MongoDB, Firebase, Supabase
BI / Reporting	Power BI, DAX, Excel, Operational Reporting, KPI Analysis
ETL / Automation	Python, ETL/ELT, dbt, Apache Airflow, Data Pipeline, Data Warehouse
Project Management & Collaboration	Jira, Confluence, Git, Project Progress Reporting

Work Experience

Gotik Consulting – Data Engineer

Python | dbt | PostgreSQL | Airflow | Power BI

03/2026 – 05/2026

- Worked with business data from the Odoo ERP system: extracted, cleaned, and standardized data using Python and SQL to prepare structured datasets for analytics and reporting.
- Built ETL pipelines to load data from source systems into Neon PostgreSQL and automated hourly runs with Apache Airflow, keeping data up to date and running continuously.
- Monitored ETL runs (schedules, task dependencies, failures) to detect and resolve incidents and keep the system stable.
- Developed dbt models to standardize raw data, improving consistency and making reporting processes easier to maintain and reuse.
- Built Power BI dashboards to track operational and business metrics, supporting performance evaluation and decision-making.

Featured Projects

Delivery Driver – Order Management & Analytics System

Python | PostgreSQL | Kafka | MinIO | RFM | Association Rule Mining

12/2025 – 02/2026

- Built an automated data pipeline with a Data Lake and Data Warehouse to collect and process order data in real time.
- Applied RFM and Association Rule Mining to analyze orders and frequent pickup–delivery location pairs, generating insights to support recommendations for opening new post offices or service points.
- GitHub: BE-delivery-driver

VehicleScan – Smart Parking Data System

Python | PostgreSQL | Firebase | ESP32 | Kafka

03/2025 – 03/2026

- Designed data processing workflows for vehicle and IoT sensor data, integrating AI, sensor, and application data into a unified system for real-time parking management.
- GitHub: VehicleScanner

Additional Information

Soft Skills	Communication and cross-team coordination | Analytical thinking | Time management | Proactive, detail-oriented
English	Technical document reading and basic professional communication
Availability	Available for ERP implementation / Business Analyst internship opportunities.
