Career Objective

Final-year Information Technology student seeking a Business Analyst internship, with hands-on experience in SQL, Excel, Python, and Power BI. Experienced in analyzing operational data, building reports and dashboards, and turning data into insights and recommendations that support business decisions and process improvement. Strong communication and teamwork skills, with experience using Jira and Confluence in team projects, and eager to learn requirement gathering and Agile project practices.

Education

University of Transport Ho Chi Minh City (UTH)

10/2022 – 10/2026

Bachelor of Information Technology – Completed coursework

- GPA: **3.4 / 4.0**
- **Excellent Scholarship** – Semester 1, 2025
- **Second Prize – AI Track**, UTH Student Scientific Research Conference 2025

Technical Skills

Business & Data Analysis	Data Cleaning, Data Validation, Exploratory Data Analysis, KPI Analysis, Trend Analysis, Business Reporting, Insight & Recommendation
SQL / Databases	SQL, PostgreSQL, SQL Server, MySQL, Joins, CTEs, Aggregations, Subqueries, Window Functions, MongoDB, Firebase, Supabase
BI / Visualization	Power BI, DAX, Dashboard Development, Data Visualization, Operational Reporting
Excel	Excel, Data Cleaning, Data Filtering, Pivot Tables, Lookup Functions, Reporting
Python	Python, Pandas, NumPy, Matplotlib, Data Processing, Data Analysis Automation
ETL / Data	ETL/ELT, dbt, Apache Airflow, Data Pipeline, Data Modeling, Data Warehouse
Tools & Collaboration	Jira, Confluence, Git, Docker, Postman, VS Code

Work Experience

Gotik Consulting – Data Engineer

Python | dbt | PostgreSQL | Airflow | Power BI

03/2026 – 05/2026

- Built Power BI dashboards to visualize operational and business metrics, providing interactive reports for monitoring performance and supporting data-driven decision-making.
- Wrote SQL queries for data aggregation, filtering, joins, and analytical reporting, ensuring reliable data sources for dashboards and business analysis.
- Processed and transformed Odoo business data using Python and SQL to prepare clean and structured datasets for analytics and reporting.
- Developed dbt models to turn raw data into structured analytical datasets, improving data consistency and making reports easier to maintain and reuse.
- Built Python-based ETL pipelines and automated hourly workflows with Apache Airflow, replacing manual data handling and keeping reports up to date.

Featured Data Projects

Delivery Driver – Order Analytics System

Python | SQL | Kafka | PostgreSQL | Power BI

12/2025 – 02/2026

- Built an automated data pipeline with Data Lake and Data Warehouse to collect, process, and prepare order data for analysis.
- Applied RFM and Association Rule Mining to analyze customer behavior and identify frequent pickup–delivery location patterns.
- Generated location-based insights to support recommendations for opening new post offices or service locations.
- GitHub: BE-delivery-driver

VehicleScan – Smart Parking Data System

Python | SQL | PostgreSQL | Firebase | ESP32

03/2025 – 03/2026

- Collected and processed vehicle and IoT sensor data using Python and SQL for real-time parking management.
- Integrated AI, sensor, and application data into a centralized system to support monitoring and data analysis.
- GitHub: VehicleScanner

Additional Information

Soft Skills	Communication | Teamwork | Analytical thinking | Time management | Independent and proactive
English	Technical document reading and basic professional communication
Availability	Available for Business Analyst / Data Analyst internship opportunities.
